

PartiSEApate Workshop

AGENDA

Spatial Planning implications of Aquaculture as a new user in the Baltic Sea

April 15th-16th 2013

Scandic Hotel, Podwale Grodzkie 9, Gdańsk, Poland

April 15th

19:00 *Get-together buffet (registration required)*

April 16th

09:00-10:15 *Welcome to the workshop and introduction to the PartiSEApate project, Joanna Przedzimirska, Maritime Institute Gdańsk, Leadpartner PartiSEApate*

Chances and opportunities for expanding aquaculture in the BSR: An Overview
Frank Neudörfer, BioCon Valley e.V. (Germany)

Integrated Multi-Trophic Aquaculture (IMTA): An overview of the concept, the Canadian experience and its potential for the Baltic Sea Region, Thierry Chopin, University of Brunswick (Canada)

Practical example of running an aquaculture in the Baltic Sea Region
Tim Staufenberger, Coastal and Marine Research GmbH (Germany)

10:15-10:30 *Coffee break*

10:30-12:30 *Sea farming in the Baltic Sea from an Aquaculture industry perspective*
Karl Iver Dahl-Madsen, Danish Aquaculture (Denmark)

Experiences from MERMAID and COEXISTS projects on combined uses with offshore wind parks – results from a first test case in the Baltic, Øivind Bergh, Institute of Marine Research (Norway)

Prospects and current European Commission initiatives on Aquaculture, Blue Growth and MSP, Koen Van den Bossche, DG Mare

MSP in the Baltic Sea Region: principles and future developments in relation to aquaculture, Axel Wenblad, former Director General of the Swedish Board of Fisheries and Government Commissioner on Marine Spatial Planning, VASAB Expert for PartiSEApate recommendation(Sweden)

12:30-13:30 *Lunch*

13:30-15:30 Working in groups on predefined questions regarding the relations between the aquaculture sector and MSP processes:

- a) What are the general expectations, hopes and fears of aquaculture towards MSP?
- b) How much space and what type of space should be reserved for aquaculture in the BSR (separately for different types of aquaculture like plants and fish)?
- c) With which other uses shall aquaculture look for joint solutions in form of separation or coexistence? What could be possible solutions for spatial conflicts?
- d) With whom should the aquaculture sector talk in a cross-sectoral dialogue?

15:30-15:45 Coffee break

15:45-17:00 Joint wrap-up: Results from the working groups – conclusions and next steps
