

DISCUSSION 1:

consultation needs and issues between shipping, fishery,
offshore energy and environmental sectors

- Shipping versus offshore
- Fishing versus offshore
- Ports versus environment/fish spawning site
- Ports versus erosion/ environment/ tourisms

- How to organise cross border/cross sectoral consultation during the planning to ensure coherence of the plans?
- How to achieve willingness to cooperate and respect concerns of the neighbouring countries (e.g., international agreements, EC regulations, pressure from international organisation)?
